**SKIP CONVEYORS
TRANSPORT SYSTEMS**

WE OFFER SOLUTIONS – innovative | individual | competent | worldwide

DUDIK brand skip conveyors and concrete distribution machines, manufactured in Bad Saulgau, are always a few steps ahead of their time.

Innovation, experience and leading technologies are the basis for **DUDIK** International being a synonym for extraordinary productivity and flexibility – already in the second generation.

Your future skip conveyor is manufactured by qualified experts with „swabian“ precision and reliability on **2000 m² of factory space.**

Over the past **35 years** we have delivered more than **950 facilities – worldwide.**

Through licence manufacturing in Japan and in the USA, the know-how of **DUDIK**

International has also been admired there for many years.

Convince yourself of our efficiency and our products for the world market, on-site in Bad Saulgau.

You are gladly invited to come and visit us.

Most modern technique - at home all over the world

Our delivery program

is lined up for the transportation of concrete by means of skip conveyors and the concrete introduction by means of concrete distribution machines.

Through the utilization of 2-way turnouts, 3-way turnouts, track section displacements, swiveling track sections, horizontal curves, and high inclinations

of over 30°, our systems can be employed very flexibly.

Solutions from a single source

are hereby one of our major focuses. Therefore we offer you our proven complete service: from the consulting, planning and production up to the complete assembly and commissioning. The **DUDIK** customer service can of course be requested any time.

Extreme conveyor systems are our standard

Our special undercarriages and individual friction wheel drives enable even the narrowest curve radius and extreme inclinations of over 30°.

We begin, where others can't perform anymore.

All buckets are available as monorail- and dualrail-systems in sizes from 500 l to 6000 l

- Flap bucket
- Rollover bucket
- Combined rollover/flap bucket
- Double chamber flap bucket for two kinds of concrete
- Double chamber rollover bucket for two kinds of concrete
- Bucket with conveyer-belt for a regulated transfer
- Lift bucket
- Bucket with heating, up to 150° C
- Concrete distributor systems
- Transfer silos mobile
- Transfer silos stationary up to 20000 l
- Transport trolley
- Turnouts, displacements, swiveling sections
- Weighing bucket for additives
- Special constructions

Our current
delivery program is
available at:

OUR DELIVERY PROGRAM – demand-led and trend-setting

Distributor bucket in a bridge 25 m

Everything from a single source

- Consulting and planning
- Delivery from in-house production
- Complete assembly
- Operational handing over
- Customer service

3 rollover buckets 4500 l

Discharge into the distributor

Rollover bucket 3500 l in a 10° inclination

Automatic return travel to the distributor

Our systems distinguish themselves through:

- High inclination climbing capacity of over 30°
- High speed undercarriages with up to 250 m/min
- High operational safety
- Low-maintenance design
- Long-lasting technology
- Quiet run
- Low operating costs

MONORAIL- and DUALRAIL-SYSTEMS

Flap bucket in a bridge 30 m

Inclination after the mixer 30°

Our skip conveyors are designed as a modular system

Through this, we can offer individual solutions tailored to your needs at series production prices.

We manufacture everything ourselves – quality made in Germany.

Rollover bucket 3500 l in a 30° inclination

Flap bucket / Transfer silo 5000 l

2 x Rollover bucket 3000 l 2 x 140 m

Rollover bucket 2000 l in a 20° inclination

Directly discharge into crane bucket

Extreme conveyor systems are our standard

Our special undercarriages and individual friction wheel drives enable even the narrowest curve radius and extreme inclinations of over 30° as well as speeds of up to 250 m/min.

Rollover and flap bucket

Rollover bucket in a bridge 25 m

Track route with curves 350 m

We begin, where others can't perform anymore

CONCRETE DISTRIBUTOR SYSTEMS

Distributor with elevation adjustment

Distributor bucket 180° rotatable

Automatic return travel to the manufacturing facility

Half portal, span width 23 m

Rollover bucket and distributor 3000 I

Since 1981

Over the past 35 years we have delivered more than 950 facilities worldwide. We are proud to have very content customers in

**Europe - Africa - USA - South America
- Russia - Australia and in Asia.**

Our export ratio is approx. 80%.

DUDIK International - at home all over the world!

Automatic return travel of the skip conveyor to the concrete distributor, and from the concrete distributor to the extruder

Our experiences will become your advantages

SPECIAL BUCKETS

Double chamber - bucket for two concrete types

Discharge rollover bucket into a distributor

Heated bucket, up to 150° C

Combined rollover/flap bucket

Weighing bucket for additives

Displacement turnout

Rollover/flap bucket

Transfer silo 20000 l

Rollover bucket 2500 l in a bridge 20 m

Rollover bucket 3000 l in a bridge 25 m

Flap bucket 5000 l

Dual rollover bucket

Extreme inclination 30°

Rollover bucket 4000 l in a 10° inclination

Double chamber bucket with 6000 l

Spiral curve 15°
